

Integrity in Science: Implications for the Climate Change Debate

A seminar by Professor Sir Peter Gluckman

5.00 pm Wednesday 9 June 2010

Government Buildings, Lecture Theatre One, Victoria University's Pipitea Campus, Wellington

Professor Sir Peter D Gluckman KNZM FRSNZ FMedSci FRS is Chief Science Advisor to the Prime Minister. He is also University Distinguished Professor, Professor of Paediatric and Perinatal Biology and Director Emeritus in the Liggins Institute University of Auckland and Programme Director, Singapore Institute for Clinical Sciences. His own research spans from molecular to economic, encompassing the regulation of fetal and postnatal development, the long term consequences to poor start to life, and the evolutionary-medical interface. This has an agricultural as well as human perspective. He has taken an active role in promoting public engagement with science.

This event is one of the *Key Policy Challenges Facing New Zealand* seminars, a series of six being presented by the School of Government and the Institute of Policy Studies, Victoria University. The final one to follow is:

Professor John Hattie *National Education Standards for New Zealand*

5.30 pm Wednesday 16 June

Government Buildings, lecture theatre three
