

New Zealand Centre for Sustainable Cities

Seminar Series

Conflicts and Trade-offs in Sustainable Solutions

An exploration of the conflicts and trade-offs between different policies intended to solve different problems. Burning wood is seen as sustainable and carbon neutral, hence good for climate change mitigation but is a disaster for air quality and health, likewise the shift to diesels.

The intention will be to start a debate on how these conflicts can be identified and resolved.

Wednesday, 6 May 2009, 5.30-7.00pm

5:30-6:05

Dr Guy Coulson – Group Manager, Urban Air Quality and Health
National Institute of Water & Atmospheric Research Ltd.

Dr Ian Longley – NIWA
